

Graphic Standards Footprints in Time

Logo

The Beaty Biodiversity Museum logo was designed in 2005, and reflects a recurring branching pattern found in nature within a circular field of view.

Primary

The primary logo with wordmark should be used wherever possible. In print, the logo is rich black CMYK 60/60/60/100.

Secondary

The secondary "stacked" logo may be used where a vertical or more square format is needed.

Symbol

The circle without the wordmark is used rarely, and only on occasions where the wordmark would be redundant or illegible.

Reverse and brand colour

The logo may be reversed in white CMYK 0/0/0/0 with 100% opacity against a high-contrast background. When a brand colour is needed, "Beaty red" CMYK 0/100/100/0 is used.

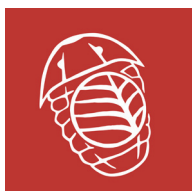

Spacing

There should be adequate space surrounding all sides of the logo, equivalent to half the height or width of the circle.

Collections and colours

Each collection in the museum has its own logo and colour assigned to it for wayfinding and branding.

Fossil Collection

Trilobite

CMYK 3/92/84/12

Fish Collection

Salmonid skeleton

CMYK 96/53/5/24

Spencer Entomological Collection

Western tiger swallowtail butterfly

CMYK 66/76/0/0/

Herbarium - Fungi

Gilled mushrooms represent the fungi, a separate kingdom from the rest of the Herbarium collection

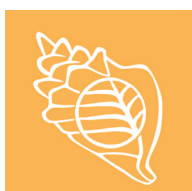

CMYK 17/28/52/0

Herbarium - Plants

Garry oak leaf

CMYK 78/5/98/24

Marine Invertebrate Collection

Conch shell

CMYK 0/33/75/0

Cowan Tetrapod Collection

Bird primary feather

CMYK 18/79/71/56

Fonts and text

Several fonts are employed by the museum. Text boxes are generally set left-justified, rag-right, without hyphenation at the end of lines. The museum follows standard taxonomic formatting, and common names of organisms are not capitalized.

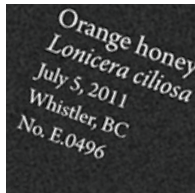

Wh

Whitney

UBC's brand font, used for external communication documents, the main website, and temporary exhibit body text.

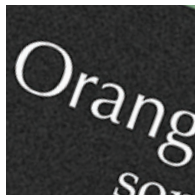

Ba

Book Antiqua

Permanent exhibit body text and museum-wide specimen labels.

Op

Optima

Exhibit titles and emphasized text.

Ve

Verdana

Numbers and diagrams where sans-serif font is required.

Hn

Helvetica Neue

Building signage and wayfinding.
